# NextGen<sup>®</sup> Ambient Assist

## Give Your Providers an Experience Advantage

### Meet your new AI ally

NextGen Ambient Assist for NextGen<sup>®</sup> Mobile utilizes the power of AI and ambient listening to securely convert natural patient-provider conversations into structured SOAP notes.

The magic doesn't stop there. Ambient Assist provides relevant suggestions for routine provider entry points such as ICD10s, medications, lab orders, and diagnosis codes. Even more, your AI ally can automatically generate patient summaries and provide even more documentation relief with a configurable charge capture workflow.

Following provider review, these notes are then automatically integrated into the patient's chart in the NextGen<sup>®</sup> Enterprise EHR. Nearly every aspect of documentation is on one screen in the palm of your hand, all thanks to the magic of AI and Ambient Assist.

### Level up from ordinary documentation

SOAP notes are generated dynamically and can be reviewed even before the patient exits the front door versus other solutions that require additional steps that consume hours after the patient visit.

With Ambient Assist at their side, providers can shift their focus from tedious documentation to quickly verifying generated notes. This leads to more time for providing excellent care.

### Features

- Works with natural, patient-provider conversations, in English or Spanish
- Generates SOAP notes in 20–30 seconds
- Integrates the note into the EHR seamlessly, with no copy and paste required
- Provides relevant suggestions for ICD10s, medications, and lab/imaging orders
- Powerful macros launch physician documentation favorites with simple phrases or words

### Benefits

- **Saves providers up to 2 hours of documentation time per day**
- Eases burnout and reduces cognitive load by eliminating the need to recall encounter details hours later
- **Frees providers to focus on their patient relationships**
- Audio and transcripts are never stored or saved to ensure privacy and security
