

## Choose an EHR partner you can trust

When replacing your orthopedic practice's EHR, choosing the right technology—and the right partner—is critical to care quality, workflow efficiency, and your financial performance. To make the transition as smooth as possible, consider NextGen Healthcare.

### Experience that makes change easier

We offer extensive experience implementing timely, seamless migration from other systems used by orthopedic practices to NextGen® Enterprise EHR. We consider facilitating this transition in keeping with our mission: to improve the lives of professionals who practice and administer orthopedic medicine and the patients for whom they provide care.

Sharpen your edge to:

- Achieve optimal clinical outcomes
- Improve revenue generation
- Navigate the journey to value-based care

### An ortho-specific approach

Aging patient populations and changing reimbursement models make it more critical to have the right technology in place.

A configurable ortho-specific EHR will help you manage growth and maintain independence. Mobile, practice management, and patient engagement solutions, along with revenue cycle management services, can further your efforts to provide excellent care.

“With the help of NextGen® RCM Services, we remained committed to our focus on patient care and were able to make necessary process changes. The financial insights we have empower us to make data-driven decisions every day to improve our business and maximize profitability.”

#### Paige LeMay

Chief Executive Officer  
Coastal Orthopedics

## Extensive capabilities to help grow your practice

With support from NextGen Enterprise, your practice can:

- Enhance workflows and save time with end-to-end orthopedic solutions
- Gain more visibility into your practice's performance with financial and operational analytics
- Streamline clinical workflows with specialty-specific, configurable content
- Stay current with regulatory and reporting requirements
- Automate the delivery of personalized communications
- Provide an easier, more engaging check-in and billing experience
- Automate charge creation and streamline claims to reduce denials
- Support patient outreach with insights into risk levels and gaps in care
- Aggregate clinical data from disparate systems with easy-to-activate APIs

## Training for successful implementation

On-site training, e-learning, and remote training are available to fast-track your implementation for everyone in your practice—the front office, physicians and other clinical staff, business operations, and IT professionals. If you have a learning management system, NextGen Enterprise-related content can be quickly uploaded for maximum efficiency.

No learning management system? No problem. You can use a turnkey solution with thousands of courses that can be customized to meet your needs.

## Switching your EHR doesn't have to be stressful. **NextGen Healthcare** offers a better way.
