

EOB Conversion

Remove manual processes + reduce paper with automated EOB conversion

Processing paper checks from payers can add up to hundreds of hours each month. Remove the manual, error-prone process of posting paper EOBs with Waystar's automated EOB Conversion. With the time and money saved by automating this process, your team can focus on higher-valued tasks. Getting paid should be simple—Waystar can help.

The Waystar difference

- Increase efficiency by removing the manual process of posting EOBs
- Eliminate data entry errors that create unnecessary work
- Streamline workflows by accessing all ERAs on a single platform
- Increase transparency by electronically indexing paper EOBs for easy reference of historical data
- Support organization stability by reallocating resources to more valuable work

A faster way to manage paper-based payments

Our simple, **two-step process** saves valuable time and supports your existing workflow.

Convert + map

- Automatically convert PDFs or TIFF images into electronic transactions (835s) to enable auto posting into your HIS or PM system

Automate more

- Converted 835s can be automatically imported into HIS or PM systems
- Use the quick search function to easily pinpoint specific ERAs without manually sorting through stacks of individual EOBs

Discover a better way forward
